

Glass Apprentice

Ben Morris

Pilkington

Ben, who has just completed a combination of a Glass and Engineering Advanced Apprenticeship, provides support for engineering craftsmen at Pilkington and is responsible for carrying out improvements and modifications.

Ben has come up with engineering solutions to overcome problems and reduce downtime. On one of the projects, Ben discovered inefficiencies on the conveyor belt RC7. By increasing the speed of the belt and not compromising the life cycle of parts they were able to overcome the problem and make a saving of over £21,500.

“Ben is a capable conscientious student who always gives 100% to his work. He has a professional approach and has gained the respect of his colleagues at all levels within the organisation. Ben has the potential to go right to the top.” Keith Arnold, Pilkington

Ben Morris was highly commended at the Proskills Annual Apprenticeship Awards 2009 for his achievements during his apprenticeship.
